<http://www.farrellforsenate.com>

- ★ Attorney and professor
- ★ Veteran with command experience

## "You Care Too Much About This Country To Let It Fall Backwards"

—President Barack Obama,  
Philadelphia, October 10, 2010

No Democrat can afford to sit out the election on November 2. Without robust Democratic turnout, Republican and Tea Party candidates would slam on the brakes and throw our country into reverse. Government of, by, and for the billionaire special interests who are anonymously bankrolling conservative candidates would weaken our economy, destroy our environment, and mortgage our children's future. Their agenda of irresponsible profiteering is clear; we cannot allow this to happen. In only two years, President Obama has prevented economic disaster, restored America's image in the world, enacted health care reform, and ended combat operations in Iraq. But President Obama cannot fix in two years the eight years of damage that were inflicted by the disastrous Bush administration. Republicans have constructed enormous roadblocks to our nation's progress. We must elect Democrats if we are to continue to move forward. Let's put the car in "D," not "R" for "reverse."

## Slay the Vote-Gobbling Gerrymander

Every ten years, states use the census to draw Congressional and state legislative districts. Pennsylvania's districts are already among the most distorted in America. Republican control of all branches of state government will guarantee lopsided boundaries that will cement Republican victories for decades. Vote for Democrats!
